

REDFIELD'S Graphic Dipping PATTERNS

Waiver for Hydro printing

I acknowledge that I have read the explanation on the T and H Camo web site of the process of Hydro printing. I fully understand that my object/optic will be submersed in water and that flooding and water damage may occur. I will not hold T and H Camo responsible for any damage related to submersion of the object/optic in water. I acknowledge that a representative from T and H Camo has explained the procedure for Hydro printing in full, and I may have done my own additional research. I am willing to allow this process to take place even though my object/optic may be damaged. I understand that optic manufacturers that make claims related to waterproof or water resistant scopes may not have indicated a total submersion of the product in water as covered under any said claim. I understand that the alteration of the optic or if damage occurs, the manufacturer may void the warranty. I give my permission to submerge my object/optic and fully understand the risks involved. If damage should occur, I will not hold T and H Camo responsible and I release and waive any claim of any kind which I may have as a result of any such damage.
